

JNA Institute has a campus response protocol in place. In an emergency or a dangerous situation, upon confirmation with the director or designee, of the need for mass notification, the director, or designee, will without delay, taking into account the safety of the community, determine the content of the notification and initiate the notification system, unless issuing a notification will, in the professional judgment of the responsible authorities, compromise efforts to assist a victim or to contain, respond to, or otherwise mitigate the emergency.

The campus takes various precautionary measures to protect the students, staff, faculty, and campus visitors. Nevertheless, unavoidable emergencies may occur in extreme situations. Therefore, the School Director implements and oversees the campus response to a crisis situation. The Campus Security Advisor ("CSA") receives training in dealing with crisis situations and will primarily direct the immediate response to a crisis situation until the arrival of law enforcement and emergency response personnel. Emergency or dangerous situations may include, but are not limited to: gas leaks, tornadoes, contagious viruses, etc.

In order to make this program effective, students and employees are to familiarize themselves with the following emergency procedures.

Nothing herein precludes any student or employee from contacting the appropriate authorities directly in the event they feel in threat of physical harm or imminent danger.

We believe student and employee behavior, which promotes security awareness, is important in all aspects of our lives and we encourage all students, faculty and staff to accept responsibility for their own security as well as the security of other members of the JNA Institute (the "School") community.

As you read the following document, please address all questions or concerns to the School's Campus Security Authority (CSA):

- Nicole DiGironimo, 215-468-8800, director@jna.edu

In the event of an emergency or a dangerous situation that poses an immediate threat to the campus community, JNA Institute of Culinary Arts may utilize some or all of its mass notification capabilities to notify its campus community. These capabilities may include e-mail, voice mail and text messages or phone notifications to alert the campus community.

In addition, members of the administration will post relevant updates and advisories on the appropriate school website (CulinaryArts.edu) and bulletin boards. The director, or designee, will simultaneously use the local means at her disposal to notify the students and employees of the situation, as well as disseminate pertinent information to relevant public entities.

This emergency notification requirement does not replace the timely warning requirement described in other campus safety policy documents. They differ in that the timely warning applies only to Clery Act reportable crimes while the emergency notification requirement addresses a much wider range of threats (i.e., gas leaks, tornadoes, contagious viruses, etc.). However, a School that follows its emergency notification procedures is not required to issue a timely warning based on the same circumstances or incident, but must provide adequate follow-up information to the community as needed.

Members of the community at large who are interested in receiving updates during an emergency can visit the website at www.CulinaryArts.edu.

Training, exercises, and tests will be conducted annually by management on the campus level and by the individuals relevant to mass notification. The CSA will document each test conducted by all relevant entities.

A

There is potential for students and employees to be involved in a variety of emergency situations for which appropriate actions must be taken. These possible situations include incidences that may require: emergency evacuation, emergency lockdown, external lockdown, or to shelter in place.

A

Evacuation is the movement of campus occupants from a dangerous or potentially dangerous location to a safe location. There are two types of evacuation: fire evacuation and non-fire evacuation.

Evacuation is mandatory when a fire alarm is activated. Designated staff or faculty check the affected building(s) to ensure all personnel are appropriately evacuating.

- Follow authorized personnel's (e.g., faculty, staff, or fire department personnel, etc.) instructions if given.
- Do not use the elevators.
- Assist people with disabilities, if possible.
- Ensure all doors and windows are closed as a room and building are evacuated. (Do not lock doors.)
- Do not attempt to reenter the facility unless and until directed to do so by authorized personnel.
- Evacuate to a safe distance and location from the building affected, away from fire hydrants, fire lanes, and not under power lines.

Non-fire emergency evacuation is used for any emergency evacuation not related to a fire incident. It is important to remember that evacuation distances significantly expand, up to hundreds of yards, for suspicious object evacuations. Nevertheless, not all bomb threats will necessarily result in evacuation,

depending upon the individual event circumstances. A non-fire evacuation will be initiated by the School's CSA. The objective will be to move all students and employees to a remote, predefined and controlled location.
